

The VIP rail system provides a consistent framework for the design of meeting rooms, offices and conference rooms. The 6 cm wide aluminium profile creates a characteristic, unbroken horizontal line and at the same time keeps all boards, flip charts and shelves in order.

Steel ball-bearings are fitted inside the rails, which makes it easy to hang up loose sheets of paper and take them down again without damaging the paper.

**Rails** **Dimensions in mm**

Single and double rails in matt anodised aluminium. Single rails have 1 sliding track for hanging up boards. Double rails have 2 sliding tracks for hanging up boards. The above rails have a clip function using steel ball-bearings inside the rails for hanging up sheets of paper. Bottom rails in matt anodised aluminium. Hidden mounting. Maximum length in one piece: 6000 mm
